**RE: ADDENDUM 1 - Escambia County Bituminous Surface Treatments Bid, 2023-2024 Fiscal Year Bid No. 10**

Interested Bidders,

The following question was received regarding the subject bid:

Question: Per ALDOT, on roads with GREATER than 500 cars/day and NOT to be covered by bituminous plant mix layer, ALDOT Spec's WILL NOT allow carbonate stone (Limestone) to be used. For this bid, assuming the roads will not be overlaid with asphalt any time soon, will the county allow Limestone to be used for the "G", "JG" and "GD" treatments?

Answer: For the sake of this bid, all proceed orders issued under this contract will be for roads with Average Daily Traffic (ADT) counts of 500 vehicles or less per day.

As a reminder, and per the instructions to bidders, "Each bidder shall include a copy of the addendum with his/her signature indicating they had received the addendum when submitting their bid."

Best regards,

A handwritten signature in blue ink, appearing to read "P. Ross".

Parker Ross, PE  
Escambia County Engineer
